

QUICKSTART **BVA** OFFERING FOR HCL Leap

Early success is the key to increase your customer's adoption and grow HCL Leap in their enterprise.

HCL Products and Platforms is offering a Quickstart Business Value engagement to get your customers off and running with HCL Leap.

The Quickstart is a combination of a brief Business Value Assessment combined with hands on services to build and application and begin enablement on HCL Leap.

Digital Transformation QuickStart is an HCL P&P bundled solution offered as a fixed price packaged. There are 2 options available based on level of integration required.

The QuickStart is software bundled with services to accelerate and ensure adoption. Through one-to-one interviews or small-group workshops, the BVA is a highly interactive, business value discussion between our teams. We'll take the input from the key stakeholders to identify the application requirements, benefits and cost analysis and then deliver the application based on one of two options.

QUICKSTART BVA OFFERINGS

FRONTEND PROTOTYPE

\$500/mo for 3 apps:

- Business Value Assessment
- 3 days of lab services for front-end development of one application at no charge

FRONTEND PROTOTYPE PLUS

\$500/mo for 3 apps + \$20k for:

- Business Value Assessment
- 10 days of lab services to develop one integrated application (Can be used all at once or over 3-6 months)
